10  "name": "Introducing the self-driving bicycle in the Netherlands",
11  "description": "This spring, Google is introducing the self-driving bicycle in
12  Amsterdam, the world's premier cycling city. The Dutch cycle more than any other
13  nation in the world, almost 900 kilometres per year per person, amounting to over
14  15 billion kilometres annually. The self-driving bicycle enables safe navigation
15  through the city for Amsterdam residents, and furthers Google's ambition to
16  improve urban mobility with technology. Google Netherlands takes enormous pride in
17  the fact that a Dutch team worked on this innovation that will have great impact
18  in their home country.",
